GET MORE FROM YOUR RESERVATION SYSTEM

- Gain access to a huge reservation network
- Efficiently manage diners to optimize capacity
- Personalize the guest experience
- Improve loyalty with targeted marketing campaigns

GET READY FOR DIGITAL TRANSFORMATION

Take your hospitality business online and avoid unnecessary fees

Table Management

Manage guests efficiently through the entire dining experience with a powerful table management system that empowers restaurants to work smarter and gives you the tools to turn tables faster, manage waitlists, and reduce errors.

Online Reservations

Move to a reservation system that helps you improve efficiency, increase revenue, and take control of the guest experience. Optimize your restaurant's bookings and walk-ins and gain access to a global reservation network with Eat App

Advanced Analytics

Gain access to advanced restaurant analytics, trends, and forecasting for your restaurant. From staffing to marketing, get real-time dashboards and analytics reports that help you improve performance across your restaurant.

CRM & Guest Profiles

Give your staff access to rich customer data. Build customer profiles on autopilot. Track preferences and birthdays and start delivering personalized experiences for your guests that will improve customer loyalty and retention.

Reserve with Google

Harness the power of Google and get more confirmed reservations. Connect real-time table availability to your Google Business account and provide your guests with a fast and reliable booking experience from search results.

Online Ordering

Maximize revenue by setting up a detailed e-menu that enables streamlined online ordering and contactless dining for your restaurant. Deliver exceptional service to both in-house and online diners with a system focused on customer service.

SEE WHY 2000 RESTAURANTS IN 20 COUNTRIES TRUST EAT APP

Find out why thousands of restaurants are switching to Eat App for their restaurant software.
